## Pioneer CDJ-800 Pro DJ CD Player

# Pioneer

DJ's everywhere can now take their skills to new levels. The CDJ-800 not only reproduces the touch and feel of a vinyl deck, it also delivers innovative features and functions. The CDJ-800 is built around Pioneer's acclaimed Jog Wheel technology. In response to feedback from the pro-DJ community, it has also added completely new and unique features:

### Quick Return

Scratch the same sound repeatedly, without re-cueing every time

### Auto Beat Loop

DJs can create a perfect 1/2, 1/4, 1/8 or full bar (1/1) beat loop instantly, just by touching the appropriate button.

### "Wide" Pitch Control

DJs can use the +/- 100% pitch control to create new sound effects and BPM match completely different tracks

### One button touch release

Adjust Jog Wheel sensitivity to suit individual DJing styles

### Digital Out

Ensure digital purity and functionality in hi-tech environments

The CDJ-800 is compact and durable making it ideal for surviving life on the road and for playing in tough club environments. It feels like a vinyl deck and delivers digital player power to home-DJs, mobile professionals and superstar DJs everywhere.

## HIRE RATE: £20 PER DAY

## Rycote Windshield System (For AKG SE398B)

# Rycote

microphone windshields limited

Sound By Design now has the ability to supply fully weatherproof shotgun microphones with the purchase of Rycote windshields for our stock of AKG SE398B's. The full windshield system is made up of the following elements:

- Modular Suspension (shock mount)
- Rycote Windshield (windscreen, blimp or zeppelin)
- Windjammer (furry cover)

### Modular Suspension

The Modular Suspension is a four point elastic suspension, which completely supports the microphone in a cradle arrangement. The suspension can be used on its own or in conjunction with the Windshield & Windjammer.

### Windshield or Windscreen

The Windshield (zeppelin) slides onto the Modular Suspension, and completely surrounds the microphone & its connector. It protects the microphone from the effects of wind, with minimal effect to the sound.

- Designed to provide significant improvement in exterior wind attenuation (up to 25dB).
- Manufactured from flexible grey plastic netting tube with a screening material, providing lightweight strength and durability.

### Windjammer

The Windjammer is designed to fit over the Windshield to provide the highest possible protection against extreme wind.

- The most effective cover, providing 10-12db extra protection over a standard Windshield
- Made from specially designed and manufactured screening materials with virtually no adverse effect on sound level or quality

## HIRE RATE: £10 PER DAY (EX. MIC)
